She has been working in this industry for 9 years and has provided many advices in personal safety equipment in various workplaces including construction sites, hospitals, laboratories, factories and property management etc.

Abstract :

Work at height could be the most dangerous job. People react with fear and confusion when incident happened. However, accident and tragedy could be avoided.

Knowing the right personal protective equipment is the best way to overcome threats. Harnesses for different application, from construction to confines space; Flexiguard to provide passive fall protection (working platform) and anchorage point at the same time; anchorage point that move along with user's movement such as horizontal / vertical life-line/ i-beam and the fall protection for tools (FPFT) particularly to avoid falling object.
