Abstract :

GRI 403: Occupational Health and Safety 2018 sets out reporting requirements on the topic of occupational health and safety. It can be used by an organization of any size, type, sector or geographic location that wants to report on its impacts related to this topic. GRI 403 was aligned with key instruments developed by the International Labour Organization and with the ISO 45001 standard. It represents global best practice on reporting about occupational health and safety management systems, prevention of harm and promotion of health at work.

The main target audiences of this webinar are report preparers or professionals in the field of ESG that identified occupational health and safety as a material topic.
